PROFESSIONAL SUMMARY

Data Science and Python Full Stack Developer with strong expertise in machine learning, data analytics, and end-to-end web application development. Experienced in building predictive models, performing data preprocessing and EDA, and deploying ML-powered applications using Flask. Focused on building data-driven solutions that solve real-world business problems.

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, Java, HTML5, CSS3
- Data Science & Machine Learning: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow/Keras, EDA
- Backend: Flask, RESTful APIs
- Frontend: React.js, Bootstrap, Tailwind CSS
- Database: MySQL, PostgreSQL, MongoDB
- Cloud & Tools: AWS (EC2, S3), Docker, Git, GitHub

PROJECTS

Customer Churn Prediction System

Built a machine learning model to predict customer churn using classification algorithms. Performed data cleaning, feature engineering, and EDA. Deployed the trained model using Flask for real-time predictions.

Movie Recommender System

Developed a content-based recommendation system using cosine similarity on 5000+ movies dataset. Integrated TMDB API for posters and deployed using Streamlit.

EDUCATION

B.Sc. Computer Science | 2025

Relevant Coursework: Machine Learning, DBMS, Artificial Intelligence, Data Structures
